

PATENT LICENSING

CONTEXTUAL SERVICE DELIVERY PATENT PORTFOLIO

A versatile portfolio of patent and pending application encompassing the release of a contextual service to an authenticated user, relevant in diverse applications across multiple industries.

PATENT SCOPE

Contextual service delivery involves the invoking of an application on a pre-configured mobile device, when the user is at a service delivery device, authenticating both the user and the delivery device, and releasing the requested service to the user at the device.

The contextual service delivery patent portfolio is the result of Thinxstream's investment in its products business.

Core to the service delivery work flow is the leverage of short range communication method, based on QR code, RFID, NFC, barcode and similar technologies.

MARKET POTENTIAL

Contextual service delivery has tremendous potential, given the proliferation of mobile devices, the ubiquitousness of cloud computing and the growing trend towards self-service.

It finds relevance in diverse applications across a wide range of industries.

| Industry | Typical Applications | Industry | Typical Applications |
|--|--|--|--|
|  Automotive | Keyless Vehicle Entry |  Financial Services | ATM Cash Withdrawal, Digital Payment |
|  Consumer | Keyless Home Entry |  Information Technology | Secure Printing, Secure Login |
|  E-Commerce/Retail | Gift Return, Locker for Delivery Pickup/Return, Product Review, Vending Machines |  Travel | Boarding Pass, Car Park Entry, Rental Vehicle Pickup, Toll Gate Access |

PATENT PORTFOLIO

Our patent portfolio is available for licensing, either on a royalty-basis or an outright sale basis. It can be leveraged by your organization to build upon and develop new technologies, and grow your business.

If desired, Thinxstream can assist you with cost-effective, high-quality engineering services to develop your offerings based on the patents.

| Serial No. | Title |
|--|--|
| Issued US Patents | |
| 10,834,584 | System & Method for Contextual Service Delivery via Mobile Communication Devices |
| Pending US Patents – Published Applications | |
| 17/115784 | System & Method for Contextual Service Delivery via Mobile Communication Devices |
| 17/394402 | System & Method for Contextual Service Delivery via Mobile Communication Devices |

Earliest Priority Date: July 16, 2015 | **Residual Term:** ~14 years

More Information: [Thinxstream Patent Portfolio](#)

The portfolio consists of 1 US patent and 2 US patent applications. As a non-practicing entity now, we continue to maintain and enhance it.

Thinxstream Technologies is a global software company with a portfolio of innovative software platforms, components, solutions, patents, competences and services for Internet of Things (IoT) across several industry verticals and applications, successfully enabling leading customers, including Fortune 500 companies, meet their application, product and business goals.
